

in my opinion, xm satellite radio provides superior reception and provides my choice of listening material accross the us. i am no longer tethered to each radio station's programming as i travel from one area into another. weather and trafffic is of interest to me where i am headed not necessairly where i am(which is what standard radio provides). xm gives me the info i am looking for as i travel. the service xm provides is beyond comparison which is the quality i pay for.

please reject NAB's petition 04-160.

a very satisfied xm listener that no longer listens to standard radio.
